REISSUE APPLICATION DECLARATION BY THE INVENTOR

Docket Number (Optional)  
10767-003001

I hereby declare that:

Each Inventor's residence, mailing address and citizenship are stated below next to their name.  
I believe the inventors named below to be the original and first inventor(s) of the subject matter which is described and claimed in the patent number 5,800,057, granted September 1, 1998  
and for which a reissue patent is sought on the invention entitled Driving Head For Stirrer Cans

The specification of which

is attached hereto.

was filed on August 25, 2000 as reissue application number 09/648,588  
and was  
amended on January 27, 2003  
(if applicable)

I have reviewed and understand the contents of the above identified specification, including the claims, as amended by any amendment referred above.

I acknowledge the duty to disclose information which is material to patentability as defined in 37 CFR 1.56.

I hereby claim foreign priority benefits under 35 U.S.C. 119(a)-(d) or (f), or 365(b). Attached is form PTO/SB/02B (or equivalent) listing the foreign applications.

I verily believe the original patent to be wholly or partly inoperative or invalid, for the reasons described below. (Check all boxes that apply.)

by reason of a defective specification or drawing.

by reason of the patentee claiming more or less than he had the right to claim in the patent.

by reason of others errors.

At least one error upon which is reissue is based is described below. If the reissue is a broadening reissue, such must be stated with an explanation as to the nature of the broadening:

The patent claims less than I had a right to claim, in that the specification of the issued patent discloses an invention that is broader than what is claimed. One error relied upon as the basis of this reissue application was that of originally filing claims directed to subject matter that was narrower than I had a right claim. Claims 1, 11 and 12 are the independent claims in the patent. Claim 1 recites a driving head for a stirring can, the stirrer can comprising a rotatable plate having upwardly projecting fingers. Claim 11 recites a can with a spring. Claim 12 recites a cabinet for stirrer cans, the cabinet comprising a plurality of hollow shelves. The specification, on the other hand, more broadly describes the invention of systems for stirring paint and paint stirring heads including a downwardly extending inference arm that prevents rotation of a paint can by interfering with or engaging its cover. This error and any and all other errors being corrected in the reissue application as of the filing date of this declaration, including all errors that were not covered by the prior declarations submitted in the application, arose without deceptive intention on the part of the applicant.
